SENIOR STAFF SOFTWARE ENGINEER / ARCHITECT

SUMMARY

Senior Staff Software Engineer / Architect with 30+ years of experience designing and building scalable distributed systems and leading enterprise modernization initiatives. Proven track record delivering high-impact microservices architectures for global organizations including American Airlines and Cisco Systems.

Expertise in microservices, DevOps/CI/CD automation, and multi-cloud platforms (AWS, Azure, IBM Cloud). Known for driving architectural decisions, mentoring engineers, and leveraging AI-assisted tools to accelerate development while maintaining high-quality coding standards.

TECHNICAL SKILLS

- Languages: Bash, C/C++, Cobol, Java, Kotlin, Perl, PHP, Python, PL/SQL, JavaScript, TypeScript
- Frameworks (Java): Apache Camel, Struts, Hibernate, JUnit, Mockito, WireMock, Spring Boot
- Frameworks & Libraries (Python): Flask, FastAPI, FastMCP, OpenAI, PyTorch
- Software Build: Makefile, Maven, Ant, Gradle
- Cloud Platforms: AWS, Azure, IBM Cloud (Kubernetes), Cloud Foundry
- DevOps & CI/CD: GitHub Actions, Azure Pipelines, CircleCI, TeamCity
- Infrastructure as Code: Terraform, AWS CDK/CloudFormation, Ansible Playbooks
- Observability: OpenTelemetry, Dynatrace, ELK Stack, Splunk, Azure Log Monitoring
- Databases: IBM IMS, MySQL, MongoDB, PostgreSQL, Oracle, Redis, Versant OODB/C++
- Messaging & Middleware: CORBA, RabbitMQ, REST, SOAP, Node.js, TCP/IP
- AI Tools: Claude Code, GitHub Copilot, Glean, Microsoft Copilot

PROFESSIONAL EXPERIENCE

ONBE, Plano, TX (HYBRID)

2025 - present

Senior Staff Engineer - Architecture

Tech Stack: Java, Spring Boot, Maven, Terraform IaC, GitHub Actions, Claude Code, GitHub Copilot, PostgreSQL, Azure (ACA, ARM, KeyVault, App Configuration), OTLP (Open Telemetry Protocol), Dynatrace

- Architecting and delivering OpenAPI-driven international payment processing microservices using Spring Boot 4 and Spring Cloud Azure SDK deployed to Azure Container Apps
- Leveraged AI-assisted tools (Claude Code, GitHub Copilot) to accelerate development of microservices, infrastructure code, and CI/CD workflows
- Implemented Terraform-based infrastructure code to provision Azure ARM resources for microservices
- Built CI/CD pipelines using GitHub Actions to streamline microservices deployment to Azure Container Apps

NINJAONE, TX (REMOTE)

2023 - 2025

Java Architect - Architecture

Tech Stack: Java/Kotlin, Python, Gradle, Ansible IaC, Artifactory, CircleCI/TeamCity, PostgreSQL, AWS (CDK, EC2, ECS, RDS, S3, SSM)

- Implemented AWS CDK, and Ansible playbooks to provision resources in AWS EC2/ECS
- Developed automation tooling (10K+ lines Bash), significantly improving components deployment efficiency for QA and production rollouts
- Developed web request filter in Kotlin to add appId, divisionId, and nodeId to log headers
- Wrote Swagger classes in Kotlin to generate OpenAPI spec YAML/JSON files of 1400+ RESTful endpoints

AMERICAN AIRLINES, Fort Worth, TX**2016 - 2023****Senior Architect/Developer – IT Applications**

Tech Stack: Java, Spring Boot, Ant/Ivy/Maven, RabbitMQ, Apache Camel, Azure DevOps, Artifactory, SonarQube, Cloud Foundry, IBM Cloud (Kubernetes), ELK Stack, Azure Monitor (Log Analytics)

- Led architectural design decisions across teams during modernization of airline ticketing systems
- Designed and built department starter-kit microservice used as a standard for other services
- Implemented CI/CD pipelines and build systems, improving deployment speed and system reliability
- Built event-driven microservices to rebook thousands of airline tickets due to flight cancellations
- Developed the evoucher-ms microservice during the pandemic to issue millions of AA e-Vouchers

CISCO SYSTEMS, Morrisville (Research Triangle Park), NC**2011 - 2015****Software Engineer IV – Cisco Prime Performance Manager (PPM) Team****Senior Software Developer – Contractor / Principle Solutions (2011 – 2012)**

Tech Stack: JDK 7, JavaScript, Jboss/Tomcat, ClearCase, Ant, Cisco Cloud Virtualization

- Designed and developed Cisco Prime Performance Manager REST API supporting a network monitoring platform handling 100K+ devices and 9.7M interfaces at scale. Authored the Cisco PPM REST API Guide

POCKETGEAR APPIA, Durham, NC**2010 - 2011****HANDANGO**, Irving, TX (acquired by PocketGear)**2007 - 2009****Senior Software Developer - Engineering**

Tech stack: Java. JBoss/Tomcat. MSSQL DB. JSP/CSS, JavaScript. Subversion (SVN), Ant/Maven

- Architected and developed Vodafone India RESTful service for billing and retrieval of mobile ID, and mobile AppStores for Opera, Zedge, Vodacom South Africa, Vodafone India & Egypt, Myxer, Opera, Iusacell (Mexico), Mobily (Saudi Arabia), Digicel, AMX Claro, BlackBerry RIM, and Sony-Ericsson

OI TELECOM, Rio de Janeiro, RJ Brazil - **IT Architect****AMERICAN AIRLINES**, Fort Worth, TX - **Sr Consultant - Contractor / Valtech****EDS**, Rio de Janeiro, RJ, Brazil – **Sr Programmer Analyst****T-SYSTEMS**, São Paulo, SP Brazil – **Project Manager – Contractor / H2M****DIVEO BROADBAND NETWORKS**, São Paulo, SP Brazil – **Sr Systems Manager****FUJITSU NETWORK COMMUNICATIONS**, Raleigh, NC – **Software Development Engineer****SPRINT CORPORATION**, Overland Park, KS – **Software Engineer III****CERNER CORPORATION**, Kansas City, MO – **Programmer Analyst****EDUCATION****Master of Science, Electrical Engineering**

The University of Kansas, Lawrence, KS

Bachelor of Science, Computer Engineering

The University of Kansas, Lawrence, KS

OPEN-SOURCE PROJECTS

- Personal GitHub page: <https://github.com/rubensgomes>
- Developed AI [agent](#) and Model Context Protocol (MCP) [servers](#) using Python (FastMCP)

CERTIFICATE AWARDS / TRAINING

Cisco Systems - Achievement Program Awards, PPM REST API Project

American Airlines - Certificate of Excellence, AA.com ITA Award Project

Fujitsu - Engineering Yearly Excellence Award, FETEX 150 NMS Project

Confluent - Certificate of Completion, Fundamentals of Apache Kafka Training
